

Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Phase 3 - Project Design

Purpose: Design the workflow, data flow, request structure, and automation logic before implementation.

Section	Details
Workflow Design	Request submission → validation → approval → procurement task → fulfillment → completion.
Data Design	Capture requester, laptop type, quantity, justification, approval status, and fulfillment status.
Flow Design	Use Flow Designer to trigger actions from a standard laptop request and automate subsequent steps.
Interface Design	Provide a simple request form with clear fields and status information.

Project Note: This phase document is prepared for organizing the TN Skills project evidence and can be supplemented with your actual screenshots/configuration details.
