

# Streamlining IT Procurement

## Automating Standard Laptop Orders with Flow Designer

### Phase 4 - Development / Implementation

**Purpose:** Implement the designed procurement automation using the selected platform and Flow Designer.

| Section                      | Details                                                                                      |
|------------------------------|----------------------------------------------------------------------------------------------|
| <b>Platform Setup</b>        | Configure the required application, tables, forms, users, and roles.                         |
| <b>Request Configuration</b> | Create the standard laptop request form and required fields.                                 |
| <b>Flow Configuration</b>    | Configure the trigger, conditions, approvals, tasks, notifications, and completion actions.  |
| <b>Implementation Result</b> | The configured workflow processes standard laptop requests through defined automated stages. |

**Project Note:** This phase document is prepared for organizing the TN Skills project evidence and can be supplemented with your actual screenshots/configuration details.
