

Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Phase 7 - Deployment

Purpose: Prepare the completed solution for use in the intended environment.

Section	Details
Deployment Preparation	Verify configuration, roles, workflow logic, test results, and required data before deployment.
Release	Move or publish the completed configuration according to the project environment requirements.
Verification	Perform a final request and confirm that automation, approvals, tasks, and notifications operate correctly.
Maintenance	Monitor the workflow and update configurations when procurement requirements change.

Project Note: This phase document is prepared for organizing the TN Skills project evidence and can be supplemented with your actual screenshots/configuration details.
